

## Learning Module

# Introduction to XFlow

---

This course introduces the XFlow Graphical User Interface (GUI), and shows how to run a simulation.

### Objectives

Upon completion of this course you will be able to:

- Get started with the XFlow GUI.
- Set up a single phase simulation in XFlow.
- Post-process simulations in XFlow.
- Learn how to use the different lattice refinement schemes.

### Knowledge Prerequisites

None

### Language(s) for selected release

English

### Brands

Simulia

### Available Releases

SIMULIA 2021, SIMULIA 2020, SIMULIA 2019,  
SIMULIA 2018

### Duration

8 hours

### Discipline

XFlow
