

Learning Module

Isight Component Development

This course covers the process of designing, building, publishing, debugging and testing custom components and plug-ins, utilizing the Isight SDK. The course is highly interactive with a strong emphasis on practical workshops using a standard Integrated Development Environment (IDE).

Objectives

Upon completion of this course you will be able to:

- Understand component requirements.
- Develop component packages for Isight.

Knowledge Prerequisites

This course is recommended for engineers with experience using Isight

Language(s) for selected release

English

Brands

Simulia

Available Releases

SIMULIA 2021, SIMULIA 2020, SIMULIA 2019, SIMULIA 2018, SIMULIA 2017, SIMULIA 2016

Duration

16 hours

Discipline

Isight

Contents

Overview - Isight Component Development

- 1 - Introduction
 - 2 - Basic Component Anatomy
 - 3 - Building and Testing Components
 - 4 - Advanced Component Anatomy
 - 5 - Integration Methods
 - 6 - Optimizer Plug-in Development
- A1 - Isight Developer and Debugger for Eclipse
